Summary

Driven and innovative web developer with extensive experience in ReactJS development. Proficient in building and optimizing user interfaces for high-performance web applications. Adept at collaborating with cross-functional teams to deliver high-quality projects on time. Skilled in quantitative modeling, state management, and responsive design. Seeking to leverage my expertise to enhance user experiences on a global scale.

Education

O.P. Jindal University   Raigarh, India

Bachelor of Technology in Computer Science   (2019 - 2023)

Work Experience

I connectifly Software technology,

App Developer (Pune, Maharashtra August 2022–December 2022)

- Developed and design a Mentor Mee Metting application with an intuitive user interface .
- Using Flutter Framework , Getx , and third party Api's.
- Implemented utilities, and exception handling, enhancing optimization reducing error .
- Designed workflows for 30% faster development and improved collaboration.
- Utilized Firebase for authentication, real-time database, and cloud storage to manage user data and session information efficiently
- Collaborated with cross-functional teams, including designers and backend developers, to ensure smooth integration and functionality.
- Reduced app load time and memory usage by optimizing code and leveraging lazy loading techniques.

Skills and Competencies

- **Programming:** Python.
- **Development:** HTML, Javascript, React.js, Tailwind CSS, Node.js, SQL, MongoDB, SQL, Numpy Pandas
- **Tools & Framework:** Canva, GIT, Vs code , Power BI

Projects

Projects Amazon Clone   March 2024

- Developed an Amazon clone project using ReactJS Framework.
- Implemented features such as product listings, user authentication, shopping cart functionality, and checkout process. Utilized ReactJS for building reusable components and managing state efficiently
- Designed responsive and visually appealing user interfaces using Tailwind CSS .
- Implemented dynamic routing using React Router for seamless navigation between pages.
- Ensured the application is fully responsive and mobile-friendly by utilizing Tailwind CSS for styling.
- Technology used **- ReactJS, Redux, Tailwind CSS, HTML, JavaScript**

Projects Netflix Clone   July 2024

- User Authentication: Implemented secure login and signup functionality using MongoDB.
- Movie Database Integration: Integrated TMDB API to fetch and display movie details dynamically.
- Responsive UI: Designed a responsive and visually appealing user interface with Tailwind CSS.
- Hooks: Employed React Hooks for managing state and side effects, enhancing code readability and maintainability.
- State Management: Utilized Redux for efficient state management and smooth user experience.
- Card Functionality: Developed interactive cards to display movie information with hover effects and animations.
- Technology used **- ReactJS, Redux, Tailwind CSS, HTML, JavaScript, MongoDB,**

Certifications

- **Udemy** - (Flutter App development)-2021
- **Toycathon 2021 (Hackathon)** - Smart India Hackathon
